EDUCATION

University of California, Berkeley – Berkeley, CA

Bachelor of Science in Computer Science

Expected Graduation Date: May 2024

Cummulative GPA: 3.90/4.00

- Relevant coursework: Information Security Principles, Network and Web Security, Incident Response and Forensics

SKILLS

- Languages: Python, Bash, PowerShell, Java, SQL
- Tools: Wireshark, Metasploit, Nessus, Splunk, Burp Suite

EXPERIENCES

Cybersecurity Trainee

GuardianCyber Corp. | San Jose, CA | Jan 2023-Mar 2023

- Participated in red team exercises, simulating cyber-attacks to test organizational defenses
- Analyzed and documented incident response procedures, improving response time by 15%
- Conducted security awareness training sessions for employees, enhancing the organization's security posture

Research Assistant

UC Berkeley Cyber Lab | Oakland, CA | Sep 2022-Dec 2022

- Conducted research on phishing attack techniques and their detection
- Developed a prototype for a machine learning-based malware detection system
- Presented a seminar on 'Emerging Cyber Threats and Defenses' to students and faculty

Security Intern

SecureTech Solutions | San Francisco, CA | Jun 2022-Aug 2022

- Assisted in vulnerability assessments, identifying potential security risks in the infrastructure
- Collaborated with the IT team to patch and remediate identified vulnerabilities
- Monitored security alerts and logs using SIEM tools, escalating potential threats

PROJECTS

Secure File Transfer System

- Designed a system to securely transfer files using end-to-end encryption
- Implemented multi-factor authentication to enhance security

Secure File Transfer System

- Developed a tool to scan websites for common vulnerabilities like SQLi and XSS
- Integrated the tool with a reporting system to provide actionable insights
